Noufan TN

Cybersecurity Student | MSc Computer Science | Kerala University of Digital Sciences, Innovation & Technology
Muvattupuzha, Kerala, India

Summary

I am an MSc Computer Science student specializing in Cybersecurity at Kerala University of Digital Sciences, Innovation and Technology. My academic background includes a BSc in Physics with Electronics, which has given me strong analytical, mathematical, and systems-level problem-solving skills, along with a foundational understanding of electronic circuits, hardware systems, and IoT concepts.

I am building a solid foundation in cybersecurity concepts such as network security, computer networks, cryptography, and secure system design. I am gaining hands-on experience through labs and projects using tools like Kali Linux, Wireshark, Cisco Packet Tracer, and virtualized environments.

I am particularly interested in understanding how networks, operating systems, and hardware-software interactions impact system security. I enjoy learning through practical experimentation and continuous self-study.

I am actively seeking opportunities such as internships, projects, or entry-level roles where I can apply my skills, learn from industry professionals, and grow as a cybersecurity professional.

Education

Digital University Kerala

MSc in Computer Science , Cybersecurity · (July 2025 - September 2027)

Nirmala College, Muvattupuzha - 686 661

Bachelor's degree, Physics · (September 2022 - May 2025)
